

Results of the 2020 Census Data by District

The following table from the Official Redistricting Data for the State of California provides the population totals for each district. The Official Redistricting Data applies and “ideal” population per district of 79,545. This ideal population represents the mean average obtained by dividing the City’s total population by the 11 districts. The percent deviation from this ideal population in each district is listed next to the population total in the table below.

District	Population	Percent Deviation
1	72,848	-8.31%
2	76,363	-3.89%
3	72,474	-8.78%
4	72,784	-8.39%
5	80,667	1.53%
6	103,564	+30.35%
7	75,436	-5.05%
8	82,418	+3.73%
9	75,829	-4.56%
10	86,323	+8.65%
11	76,287	-3.98%
