## Sample Our City Our Home Quarterly Dashboard

Tipping Point Community offers this sample dashboard as part of its commitment to support the development of OCOH Fund dashboards that document the impact of the OCOH Committee's investments, including progress toward Committee-approved goals and targets. The dashboard was developed with input from members of the Committee and staff from multiple related City departments.

## Sample Our City Our Home Quarterly Dashboard

- This sample dashboard is offered as a starting point for the OCOH Committee to consider data needed to measure and understand progress toward reaching the goals promised to San Francisco voters when they passed Prop C, as outlined in the document *Prop C The Plan, the OCOH Implementation Plan* and priorities identified by the Committee in the past several months. We envision the dashboard to be part of a comprehensive Homeless Response System (HRS) data reporting framework.
- While many overarching annual goals were outlined in *Prop The Plan*, to produce this suggested dashboard the Committee and the City will need to do additional goal-setting.
- We do not suggest that this is the only data the Committee should request and analyze. Rather we propose that this dashboard includes some of the most critical data needed to continually monitor and ascertain whether the HRS's utilization of Prop C funds is resulting in the intended impact.
- This sample dashboard was created with the Committee as the audience in mind. We recommend a streamlined version that is more quickly and easily digestible for public reporting.
- There are various ways in which you can display the data in this dashboard (charts, graphs, etc.) We assume you may want to redesign what is presented here.
- It is assumed that it will take some time for the HRS to be able to provide all the data in this dashboard. We suggest that what is contained in the sample dashboard is what the system should be working towards, as soon as possible.
- While some of the data in this dashboard was taken from *Prop C- The Plan* and other sources, most data is <u>not actual data</u>. Therefore, it is best to consider all data in this document as <u>SAMPLE DATA ONLY</u>.

# **Overall Impact Section**

At its core, the purpose of Prop C is to reduce the number of people experiencing homelessness in San Francisco.

It is, therefore, essential that progress toward that goal is closely tracked.
