# Summary

- DPH continues to focus efforts and messaging on improving COVID vaccination/booster rates. This is the best way for individuals to continue to protect themselves from the health impacts of COVID.
- Protect yourself and others:
  - Get your bivalent COVID booster if you haven't yet
  - Protect others—stay home when you're feeling sick
  - Practice good hygiene: wash hands, cover coughs and sneezes, and avoid touching your eyes, nose and mouth (flu can spread on surfaces or on your skin)
  - Know how to reach a doctor. If you're not feeling well, they can discuss your symptoms and treatment options.
  - Keep a well-fitted mask on hand for crowded, indoor spaces (N95, KN95 or KF944 are best)
  - Keep a supply of rapid test kits on hand. You can once again receive free test kits through the US mail by visiting [www.covid.gov/tests](https://www.covid.gov/tests)
  - If possible, increase air ventilation or air filtration when indoors or gather outdoors.
- DPH is reviewing current COVID-19 policies and health orders and has begun to remove many of these as COVID prevention and control are further integrated into standard DPH work and in preparation for the end of the CA State of Emergency on February 28, 2023.
- The White House has announced the U.S. will end the National COVID Public Health Emergency on May 11.
