**Date:** Wednesday, September 20, 2023 1:13:12 PM

---

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Dear Chair Elias and Commissioners,

In January of this year, the Police Commission voted in favor of DGO 9.07, a comprehensive policy to prohibit racially-biased traffic stops in San Francisco. Over seven months later, the policy is still in meet and confer.

There is no reason for these discussions to be taking this long. Racial disparities have not changed in traffic stops and it is time for creative policy solutions that do not reinforce the status quo. San Francisco mirrors the state and nation in over-policing communities of color via pretextual stops. Since 2018, SFPD has stopped Black people at least six times the rate of white people, searched Black people at least 10 times the rate of white people, and were at least 12 times more likely to use force on Black people than white people.

So why is DGO 9.07 still in meet and confer seven months later?

Each time the Police Commission meets and does not bring the policy back for final approval, it allows for this harm against communities of color to continue. Meet and confer has been going on for months, with plenty of time to reach agreement and move forward. **I am asking you to bring DGO 9.07 back for a final vote and implementation at the next Police Commission meeting.**

I am also sending a message to the Mayor, Chief of Police, Department of Police Accountability, and Board of Supervisors.

Thank you for your prompt attention to this matter.

Alison Goh

Police Commission Public Comment,

To President Elias and Commissioners,

I'm emailing in regards to pretext stops in the city of San Francisco. I'm invested in seeing a change in this as someone that works in the tenderloin, but also as a child and grandchild of people that have been impacted by the carceral system. In January of this year, the Police Commission voted in favor of DGO 9.07, a comprehensive policy to prohibit racially-biased traffic stops in San Francisco. Over seven months later, the policy is still in meet and confer.

There is no reason for these discussions to be taking this long. Racial disparities have not changed in traffic stops and it is time for creative policy solutions that do not reinforce the status quo. San Francisco mirrors the state and nation in over-policing communities of color via pretextual stops. Since 2018, SFPD has stopped Black people at least six times the rate of white people, searched Black people at least 10 times the rate of white people, and were at least 12 times more likely to use force on Black people than white people.

San Francisco mirrors the state and nation in over-policing communities of color via pretextual stops. Since 2018, SFPD has stopped Black people at least six times the rate of white people, searched Black people at least 10 times the rate of white people, and were at least 12 times more likely to use force on Black people than white people.

Each time the Police Commission meets and does not bring the policy back for final approval, it allows for this harm against communities of color to continue. Meet and confer has been going on for months, with plenty of time to reach agreement and move forward. That is why I am asking you to bring DGO 9.07 back for a final vote and implementation at the next Police Commission meeting.

Police Commission Public Comment,

Dear President Elias and Commissioners,

In January of this year, the Police Commission voted in favor of DGO 9.07, a comprehensive policy to prohibit racially-biased traffic stops in San Francisco. Over seven months later, the policy is still in meet and confer.

We know what traffic behaviors kill people they're highlighted in the Focus on the Five.

- speeding
- violating pedestrian right-of-way in a crosswalk
- running red lights
- running stop signs
- failing to yield while turning

We need enforcement on dangerous driving, not racial profiling.

There is no reason for these discussions to be taking this long. Racial disparities have not changed in traffic stops and it is time for creative policy solutions that do not reinforce the status quo.

San Francisco mirrors the state and nation in over-policing communities of color via pretextual stops. Since 2018, SFPD has stopped Black people at least six times the rate of white people, searched Black people at least 10 times the rate of white people, and were at least 12 times more likely to use force on Black people than white people. And this is while traffic has become more dangerous and tickets for dangerous driving have significantly decreased!

Each time the Police Commission meets and does not bring the policy back for final approval, it allows for this harm against communities of color to continue. Meet and confer has been going on for months, with plenty of time to reach agreement and move forward. That is why I am asking you to bring DGO 9.07 back for a final vote and implementation at the next Police Commission meeting.

Police Commission Public Comment,

Dear President Elias, VP Carter-Oberstone, and Commissioners,

Why is DGO 9.07 still in meet and confer seven months later?

Each time the Police Commission meets and does not bring the policy back for final approval, it allows harm against communities of color to continue. There has been plenty of time to reach agreement and move forward. That is why I am asking you to bring DGO 9.07 back for a final vote and implementation at the next Police Commission meeting.

I am also sending this message to the Mayor, Board of Supervisors, and Chief.

Police Commission Public Comment,

Dear President Elias and Commissioners,

When I first moved here in 2013, I rented a ZipCar to get around. It didn't take long before SFPD pulled me over for a bogus claim on 6th and Mission St. SFPD had their hands on their guns as they approached my car for a simple traffic stop. I might not have been in my Sunday best, but as a Brown person, I knew what was going on and I was afraid. It was night time and I knew any sudden movement might set them off and just hoped and prayed they would keep their cool. SFPD doesn't value life, and they are ready to escalate and use lethal force if they feel like it without any repercussions or accountability as our new DA has signed off on. I am not paid or trained on de-escalation but it seems to be the general public is forced to make up for the lack of skills SFPD has.

All that said, in January of this year, the Police Commission voted in favor of DGO 9.07, a comprehensive policy to prohibit racially-biased traffic stops in San Francisco. Over seven months later, the policy is still in meet and confer.

There is no reason for these discussions to be taking this long.
