## Surveillance Technology Goals

**8.1 Has the surveillance technology been effective at achieving its identified purpose?**

Yes

**8.2 In 3-5 sentences, please explain how the technology has or has not been effective**

The ALPR – GTMS has been effective as a fail-safe should the Automated Vehicle Identification (AVI) readers malfunction and fail to read the transponder which the Airport affixes to certain types of permitted vehicles. The technology assists in dispute resolution in the event that the operator challenges the transponder data (i.e., number of trips the operator has made to the Airport) collected from the AVI.

The technology is also effective in tracking permitted operators that are not issued transponders, such as TNC vehicles and long distance bus carriers; tracking unpermitted operators who solicit passengers for rides; and assisting public safety agencies in investigations.

The technology enables the Airport to assess trip fees on permitted Commercial ground transportation operators. Specifically, in 2021, the Airport collected a total of \$ 22,373,523 in trip fees from ground transportation operators.
