**From:** Celina Cuevas, PhD, Juvenile Probation Department  
**Date:** November 8, 2023  
**Subject:** Slides to highlight from the September 2023 Monthly Data Report, prepared for the 11/8/23 Juvenile Probation Commission meeting

---

The Juvenile Probation Department would like to direct your attention to the following slides from the September 2023 Monthly Data Report:

**JH Chart 4: Admissions by Primary Reason (slide 18)**

- There were 40 admissions in September, 55% of which were mandatory.
- Most non-mandatory admissions were due to a lack of non-secure options available (13), 4 of which were found to be adults after booking.

**JH Chart 1.2: Average & Peak Population (slide 7)**

- The average daily population continued its upward trend to 28 young people in September, with a peak of 39 young people.

**JH Chart 2.2: ADP by Race/Ethnicity (slide 10)**

- Latinx youth continued to account for the largest group of youth in Juvenile Hall.

**JH Chart 3.2: Length of Stay for Youth Released (slide 15)**

- The median LOS for youth released decreased in September to 4 days.

**JH Chart 5: Placement Youth in Custody (slide 20)**

- The percentage of youth in custody awaiting placement has begun to increase. On September 30, 11% of youth in custody were awaiting placement.

**PS Chart 2.4: Caseload by Demographics (slide 29):**

- As of September 30, girls account for 25% of the JPD caseload. In comparison, girls accounted for 19% of JPD's active caseload as of the end of 2022.

**PS Charts 6 & 7: Active Home Detention & Electronic Monitoring (slides 42 & 44):**

- There was a notable decrease in youth on Home Detention and youth on Electronic Monitoring from August to September, and an increase in length of stay.
