Project Description

On December 3, 2009, the San Francisco Planning Commission (SFPUC) certified the Sunol Valley Water Treatment Plant Expansion and Treated Water Reservoir Final Environmental Impact Report (EIR), and the SFPUC subsequently approved the project (San Francisco Planning Department file number 2006.0137E). The approved project analyzed in the EIR includes the construction and operation of a new treated water reservoir, a new chlorine contact tank and associated water treatment facilities, an additional flocculation and sedimentation basin, new effluent pipelines, and a new 78 inch pipeline connecting the treated water reservoir to the existing 78 inch plant discharge pipeline, which transports water from the Sunol Valley Water Treatment Plant (the plant) to the existing Alameda Siphons (where treated water enters the water transmission system). The plant occupies 28 acres in unincorporated Alameda County, approximately 3 miles south of the intersection of Calaveras Road and Interstate 680. Following implementation of the approved project, the plant is currently developed with approximately 30 buildings and structures, including an operations building and various water treatment facilities such as water and chemical storage tanks, flocculation and sedimentation basins, and filter bays.

The SFPUC proposes to modify the approved Sunol Valley Water Treatment Plant Expansion and Treated Water Reservoir project to construct a new ozonation facility and a new polymer feed facility at the plant, and to conduct repairs and improvements to existing treatment facilities at the plant. SFPUC also proposes electrical equipment upgrades at facilities that deliver power to the treatment plant to ensure that operation of the ozonation facility does not cause overloads on the Calaveras Substation main transformer, approximately 2 miles north of the plant. The proposed new ozonation facility, new polymer feed facility, upgrades to existing plant treatment facilities, and electrical upgrades constitute the modified project. The purpose of the modified project is to ensure reliable operation of the treatment plant and to meet customer expectations regarding water quality.

The proposed ozonation facility is designed to reduce the concentration of taste-and-odor-causing compounds in the plant’s raw water. The proposed polymer (flocculation aid) feed facility is designed to address turbidity issues during high flow rates at each of the five existing sedimentation basins at the plant. Other proposed repairs and improvements to existing treatment facilities at the plant include repairing the lining of the flocculation and sedimentation basins, replacing the cationic polymer (coagulant aid) system, and replacing the filter inlet and waste valves. Electrical upgrades are proposed at the plant and at a former tree nursery site and the San Antonio Pump Station, approximately 0.2 mile and 1.5 miles north of the plant, respectively. SFPUC also proposes to use the former tree nursery site for construction staging. The plant, former tree nursery site, and San Antonio Pump Station compose the modified project site.

Determinations

The SFPUC approved the plans and specifications for the modified Ozonation Facility project and awarded Contract No. WD-2897, Sunol Valley Water Treatment Plant Ozonation, to J.F. Shea Construction, Inc. by Resolution No. 24-0111 on May 14, 2024. On December 3, 2009, the San Francisco Planning Commission certified the Sunol Valley Water Treatment Plant Expansion and Treated Water Reservoir Final Environmental Impact Report (EIR), and the San Francisco Public Utilities Commission (SFPUC) subsequently approved the project (San Francisco Planning Department file number 2006.0137E). The project was officially approved by the SFPUC on December 8, 2009, when no appeal of the FEIR was filed. A copy of the document(s) may be

1. An Environmental Impact Report and an addendum have been prepared pursuant to the provisions of CEQA. They are available to the public and may be examined at the Planning Department at the above address.

2. A determination has been made that the project in its approved form will have a significant effect on the environment.

3. Mitigation measures were made a condition of project approval for the project.

4. A mitigation and monitoring reporting program was adopted for this project.

5. A statement of overriding considerations was adopted for this project.

6. Findings were made pursuant to the provisions of CEQA.

PROJECT DESCRIPTION:

The San Francisco Public Utilities Commission (SPFUC) approved the Sunol Valley Water Treatment Plant Expansion and Treated Water Reservoir ("Project") by Resolution 09-0203 on December 8, 2009. The Project as approved by the SPFUC involves the construction and operation of a new 17.5 million-gallon (MG) treated water reservoir, 3.5 MG chlorine contact tank, flocculation and sedimentation basin, construction of new effluent pipelines within the SVWTP, and a new 78-inch pipeline connecting the new treated water reservoir to the existing 78-inch plant discharge pipeline, which transports water from the plant to the existing Alameda Siphons. The proposed project would improve treatment reliability by increasing the plant's sustainable capacity to 160 million gallons per day and bring the SVWTP in compliance with CDPH.
Notice of Determination

Sunol Valley Water Treatment Plant Expansion and Treated Water Reservoir

The Project is a capital improvement project approved by the SFPUC as part of the Water System Improvement Program ("WSIP"). The WSIP was approved by the SFPUC on October 30, 2008 by Resolution No. 08-0200.

DETERMINATION:

1. The City and County of San Francisco decided to carry out or approve the Project on December 8, 2009 (SFPUC Resolution No. 09-0203).

2. A Final Environmental Impact Report ("Final EIR") was prepared and, prior to approval of the Project, was certified on December 3, 2009 pursuant to the provision of CEQA (San Francisco Planning Commission Motion No. 17992).

3. A determination has been made that the project in its approved form will not have a significant effect on the environment.

4. Mitigation measures were made a condition of project approval and a Mitigation Monitoring and Reporting Program was adopted.

This is to certify that the Final EIR, the PEIR, and the record of Project approval are available to the general public at: San Francisco Planning Department, Major Environmental Analysis Division, 1650 Mission Street, Suite 400, San Francisco, CA 94103 in File No. 2006.0137E.
