Surveillance Technology Goals ▾

8.1 Has the surveillance technology been effective at achieving its identified purpose?

Yes

8.2 In 3-5 sentences, please explain how the technology has or has not been effective

Investigations team is able to use video recordings to track incidents from its origin to its climax. They are able to view footage from several cameras that shows how a person involved in an incident was moving towards the place the incident occurred, the incident itself, and how they left. Camera footage has been used to gather evidence for security incidents and to provide information to prevent future incidents.

The incidents that were talked about here mostly took place inside our buildings, not on the streets. So crime statistics from the area are absolutely irrelevant. This technology helps us keep our clients and staff safer inside of our buildings. By reviewing the videos, we can see how incidents progressed inside the buildings and based on those observations we can make adjustments to business processes and/or adjust locations of the security guards in the buildings.
