# NEIGHBORHOOD SAFETY TEAM

The Neighborhood Safety Team (NST) is a unit within the Community Engagement Division

NST's focus is on crime prevention and safety awareness within our communities. With the help of residents, businesses, community groups, and other city agencies, we are striving to create safe and vibrant neighborhoods to live and work in San Francisco.

NST offer services that provide people with the tools, skills and knowledge to help prevent crime and violence in our neighborhoods.

The services provided are at no cost to the San Francisco Community.

With the help of the staff assigned to the team, residents will become advocates for safety and wellness in their communities.

The Neighborhood Safety Team looks forward to working with community members to create a Safer San Francisco.

# SERVICES NOT ABSORBED

## Non-City Entity Cameras

- SF SAFE contracted with Applied Video Solutions (AVS) to install and operate cameras on private property in several neighborhoods
- Upon the dissolution of SF SAFE, AVS assumed ownership of the cameras and offered to sell access to the cameras to SFPD as a service subscription
- SFPD is assessing the proposal from AVS alongside all other planned technology acquisitions
- If/when an agreement is reached, staff will assess the impact on City Chapter 19B and steps needed to comply with the policy
