Attached Fee: \$75 filing fee \$50 filing fee

Pursuant to the California Environmental Quality Act (CEQA), the Guidelines of the Secretary for Resources, and San Francisco requirements, this Notice of Determination is transmitted to you for filing. At the end of the posting period, please return this Notice to the Staff Contact with a notation of the period it was posted.

Project Description

SFPUC proposes to repair the defects identified in the O'Shaughnessy Dam Spillway Condition Assessment Subtask 4 - Physical Assessment report (Black and Veatch, 2018) which include concrete spalling, delamination, weep holes, voids, exposed rebar and aggregate, and mortar patches that did not adhere properly. The O'Shaughnessy Dam Spillway Improvement Project (project) involves repairs on the downstream and upstream (reservoir side) of the spillway structure. The specific project components are further described below.

Surficial Maintenance Repairs on Downstream and Upstream Spillways

- Following pressure washing of the concrete spillway repair areas, loose or unsound concrete around exposed rebar, voids, construction joints, or spalled areas would be chipped out or saw cut down to sound concrete.
- Repair areas would be prepared with Dural bonding epoxy prior to mortar application to resurface the defective areas.

- An approximate 8-foot-long by 0.5-foot-tall area located at the toe of the downstream spillway, which has been slightly undermined, would be repaired with pressure injected grout.

Downstream Spillway Resurfacing

Following the pressure-washing and filling of voids, cracks, and joints as described above, approximately 8,000 square feet of the downstream spillway face would be resurfaced with a veneer of mortar ranging between 0.25- and 0.5-inch thickness to maintain the concrete surface.

Determination

The City and County of San Francisco decided to carry out or approve the project on May 17, 2023, with the signing of the construction compliance form by the project manager and the SFPUC would carry out the project. The project was officially approved on June 20, 2023, when no appeal of the Categorical Exemption was filed during the 30-day appeal period. A copy of the documents may be examined at the Planning Department, 49 South Van Ness Avenue, Suite 1400, San Francisco, CA, 94103 in file no. 2023-003755ENV.

1. An Exemption from Environmental Review has been prepared pursuant to the provisions of CEQA under:
 - Ministerial (Sec. 21080(b)(1); 15268)
 - Declared Emergency (Sec. 21080(b)(3); 15269(a))
 - Emergency Project (Sec. 21080(b)(4); 15269(b)(c))
 - Categorical Exemption. Class 1, Section 15031.
 - Statutory Exemption. State code number: _____
 - Community Plan Exemption (Sec. 21083.3; 15183)
2. This project in its approved form has been determined to be exempt from environmental review because it fits the definition of the above-stated class of categorical exemption and none of the exceptions to the issuance of a categorical exemption apply.
